DETAILED ACTION

Allowable Subject Matter

1. Claims 2-4 and 6-9 are allowed.

2. The following is an examiner's statement of reasons for allowance:

Claim 2 is allowable over the prior art of record since the cited references taken individually or in combination fails to particularly disclose **a logical computing part which is adapted to output the control information generated by the processing device, unless the number of inputs of control information blocking signal is more than the predetermined number even if the transmission permitting part of the processing device outputs the control information transmitting signal.** It is noted that the closest prior art Taneka et al. (JP Patent publication No. 9-134208) discloses generating control information and determining the validity of information. Taneka also discloses applying a blocking signal when it is determined that the device is not valid. However, Taneka fails to disclose or render obvious the above underlined limitations as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
